### **DETAILED ACTION**

This is a Notice of Allowance in response to Amendment filed 2/7/2005 responsive to the prior Office Action dated, 8/24/2004.

#### ***Allowable Subject Matter***

Claims 1 and 3-8 are allowed. Renumbered as claims 1-7.

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Yasuo Muramatsu on April 8, 2005.

The application has been amended as follows:

The Abstract of the Disclosure, on page 2 of the Amendment filed 2/7/2005, has been replaced with the following new Abstract:

"A method of converting test vectors in an original cycle based test language into a target cycle based test language, by forming a set of templates depicting waveforms defined in the target test language, decomposing a waveform in the original test language into a set of constituent events where each event includes data showing at least a starting value and a number of subsequent edges of the waveform, comparing

the template and the set of constituent events at different levels of abstraction determined in advance, in the order of a signal level, a wave kind level where the signal is configured by a plurality of wave kinds, and a character level where the wave kind is configured by a plurality of characters, and storing the waveform data in the target test language when a match is detected and retrieving corresponding parameters of the waveform in the original test language”.

### **REASONS FOR ALLOWANCE**

The following is an examiner’s statement of reasons for allowance:

The prior arts of record taken alone or in combination fail to teach, anticipate, suggest or render obvious the claimed invention for a method of converting test vectors in an original cycle based test language into a target cycle based test language, including the steps recited, inter alia, in the independent claims, as follows:

Claims 1 and 8, as amended, recite the step of comparing the template derived from the waveform in the target test language and the set of constituent events derived from the original test language, wherein the step of comparing the template and the constituent event is made at different levels of abstraction determined in advance, in the order of a signal level, a wave-kind level where the signal is configured by a plurality of wave-kinds, and a character level where the wave-kind is configured by a plurality of characters.

Art Unit: 2133

Consequently, independent claims 1 and 8 are allowed over the prior arts of record. Claims 2-7 are directly or indirectly depended upon claim 1 and therefore are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**Conclusion**

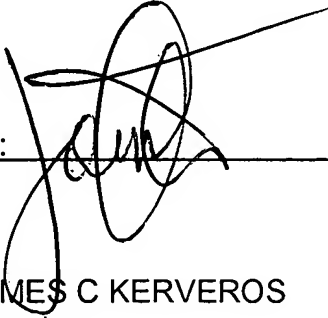

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JAMES C KERVEROS whose telephone number is (571) 272-3824. The examiner can normally be reached on 9:00 AM TO 5:00 PM.
